

IN THE SPECIFICATION:

On page 7, before the paragraph starting on line 5 (as numbered on the page), please insert the following new paragraphs:

-- Fig. 7 shows the shaving head and the cutting member having periodical motion. In an embodiment, the periodical motion is an elliptical, circular, rectangular, square, or triangular motion. An appropriate driving mechanism capable of producing the desired periodical motion will be appreciated by a person of ordinary skill in the art upon reading the specification.

Fig. 8 shows the first and second cutting members being effected by separate periodical motions. --
